

TEEN HOMESCHOOLING AUSTRALIA TERMS AND CONDITIONS 2019

1. Welcome to Teen Homeschooling Australia (Business trading name: Start Homeschooling Australia, ABN: 52440 577 915)
2. Thank you for choosing our resources. We are excited to have you along with us.
3. We are a business that services the international homeschooling community and provides high quality homeschool resources in many different subject and topic areas, online, and available for download by our members
4. All of our resources, projects and assignments are written by qualified university tutors and are correct to the best of their knowledge. If there is an error in transcripts, Start Homeschooling Australia encourages feedback from students and their families.
5. All resources are owned by Start Homeschooling Australia and cannot be sold or reproduced or printed and given away without express written permission
6. Resources can be printed, downloaded and used by families with a current membership to Teen Homeschooling Australia
7. We do not have paid affiliations with any other homeschooling business or provider at this present time
8. We do our best to align our resources with the current Australian Curriculum for ease of reporting for our parents
9. Due to the nature of the homeschooling materials and the ability of members to download and keep all materials for the year off the Teen Homeschooling Australia website, in a very short period of time (within 12 hours) we cannot, under any circumstances, provide a refund to existing members, except in the extremely rare circumstance that it is within the realms of Australian Consumer Legislation.
10. Providing student families refunds, when they have had access to the resources for the year compromises our ability to provide this service to homeschooling families in Australia, and it is important to us that we are able to provide a service that has integrity, and that can help families now and in the future

11. Resources on the Teen Homeschooling Australia website in January, are not indicative of all of the resources that will be available throughout the year. This is a unique international program that is constantly growing, and resources are added regularly throughout the year for our students
12. We highly recommend that students and their families register with the proper homeschooling body in their country or state, and use our resources in their official planning
13. We do not encourage families to use our resources without registering with their homeschooling body, and encourage homeschooling families to homeschool within their state legislation and to make use of any or all of the funding and support that is available through their local government body
14. We are not a distance education school and are not accredited to provide a full distance education program, but can provide extensive resources to use towards individual homeschool planning
15. In 2019 we do not currently provide a comprehensive math curriculum, and highly recommend that families outsource their maths study to an online math program. Programs that we have recommended in the past include: Maths Online. At times we may offer math projects that can be used in reporting.
